Technologies

INTELLIFIRE TOUCH® IGNITION SYSTEM
IntelliFire Touch is an advanced intermittent pilot ignition (IPI) system that makes starting and controlling your fireplace simple, safe and reliable. Applies to all control types (app, wall switch and touchscreen remote).

DIRECT VENT TECHNOLOGY
Direct vent fireplaces are sealed systems that pull fresh air from outside and send 100% of combustion exhaust back outdoors. That means no fumes enter your home. The result is efficient heating, better energy use and cleaner indoor air quality.

BATTERY BACK UP
Light your fire with no power! Each model is equipped with a battery backup solution that allows the fireplace to ignite when the power goes out.
