24" Smoldering Timberland Oak log set

24" Woodland Birch log set

24" Timberland Oak log set

24" Kindled Stack log set

Preserve the heart of your home with our Classic Series. Hand-painted logs are reminiscent of a rustic fire and designed to accommodate your existing firebox, providing more efficient and effortless use of an open-hearth style fireplace. Ignite via match strike for an authentic experience or enjoy easy flame-height customization via remote.

- Available in 18", 24" and 30" widths
- Four different log options
- Choose from double or single tube burner system
- Ignite the fire with the strike of a match, a standing pilot, or the touch of a remote
- Up to 80,000 BTUs

On/Off Remote Included

On/Off/High/Low Remote

* Refer to page 6 for burner and ignition details

Double Tube Burner

- Provides even more ambiance with an additional burner for twice the flame and glow*
- Available for indoor and covered patio fireplaces
- Electronic ignition including on/off remote or safety pilot ignition with built in on/off/high/low remote*

Single Tube Burner

- Provides large flames and glowing ember bed*
- Available for use indoors and outdoors
- Match light or safety pilot ignition*

BURNER & IGNITION TECHNOLOGY

IGNITIONS

Electronic - Often referred to as intermittent pilot ignition (IPI) uses battery power to monitor a safe ignition experience and save on fuel bills. Capable of being converted to 110V with accessory kit.

Safety Pilot - Provides a standing pilot to give you instant fire with the turn of a knob or push of a button. This ignition also automatically shuts off when flames go out to ensure safety.

Matchlight Ignition - As the name implies, ignites your fire with the strike of a match.

BURNERS

Stadium Burner - Two and three-tiered allow you to fill out your fireplace with a large log stack and impressive ember bed. Offered in both indoor and outdoor options with an electronic ignition system. The indoor unit includes a remote.

Radiant Burner - Specifically designed to push heat into the room. Where most gas log sets are known for aesthetics but not heat, the radiant burner provides the best of both! Available with electronic ignition that includes an on/off remote.

Contemporary Burner - Unique design to create a more modern visual inside a traditional fireplace. Multiple media options that can be mixed together if desired to create a unique experience. Available with electronic ignition that includes an on/off remote.

Tube Burners - These simplistic burners offer immersive glow and flame. The single tube, by description, offers one tube on a pan style burner emitting large flames and an active ember bed. The double tube includes an additional tube in the pan style burner to produce a much more expansive and captivating ember bed with delightful flames. Available with a matchlight, safety pilot and electronic ignition. Double tube offers a safety pilot with an on/off remote and high/low flame high adjustment.

BURNER CONTENTS

Sand: Evenly distributes flames across the burner and insulates the burner pan; primarily used on natural gas models.

Vermiculite: Evenly distributes flames across the burner and insulates the burner pan; primarily used on propane models.

Glowing Embers: Decorative material used to enhance the glow and overall aesthetics of the burner.

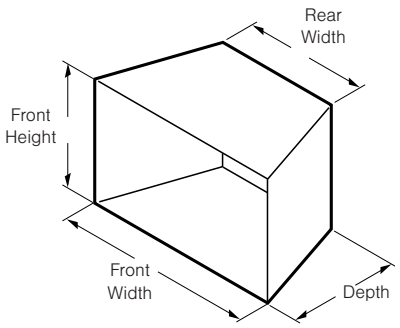

Lava Rock: Completes the look of the gas log set, providing an authentic fire experience.

FIND YOUR PERFECT FIT

STEP 1: Measure your fireplace height, width, depth and rear width. (See diagram.)

STEP 2: Choose a burner and gas log set that fits within your measured dimensions.
